

BVM 350 TON 14" SPIDER-ELEVATOR

The BVM 350 Ton 14" Spider-Elevator is a pneumatically operated power tool capable of handling casing sizes from 4-1/2" through 14" OD. When used in a set of one elevator and one spider, they allow the string to be rapidly tripped in or out of the well with minimal interaction by the operator. The Spider-Elevator is made from alloy steel, heat treated, magnetic particle inspected, and is manufactured and load tested per API 7K & 8C.
